

4 ST PHILIP'S

ADDRESS TO IMPRESS

4 St Philip's offers an unrivalled opportunity for your business to make a real positive impact on your people, your customers and your business world. Suitable for a self contained headquarters building or split as separate floors it has gone through a sympathetic yet bold 'back to frame' redevelopment. Every element of the scheme has been carefully designed to optimise the perfect balance between inspirational aesthetic appeal and practical application.

First impressions last. The entrance fronting St Philip's Square has been comprehensively reconfigured and leads into a dramatic contemporary designed reception and fully refinished communal areas. The building will provide up to 24,389 sq ft over ground plus 6 upper floors with typical floorplates of 3,384 – 3,729 sq ft.

4 St Philip's has been enhanced beyond the original design parameters to create an impactful and enviable office environment designed to meet the needs of the modern office occupier.

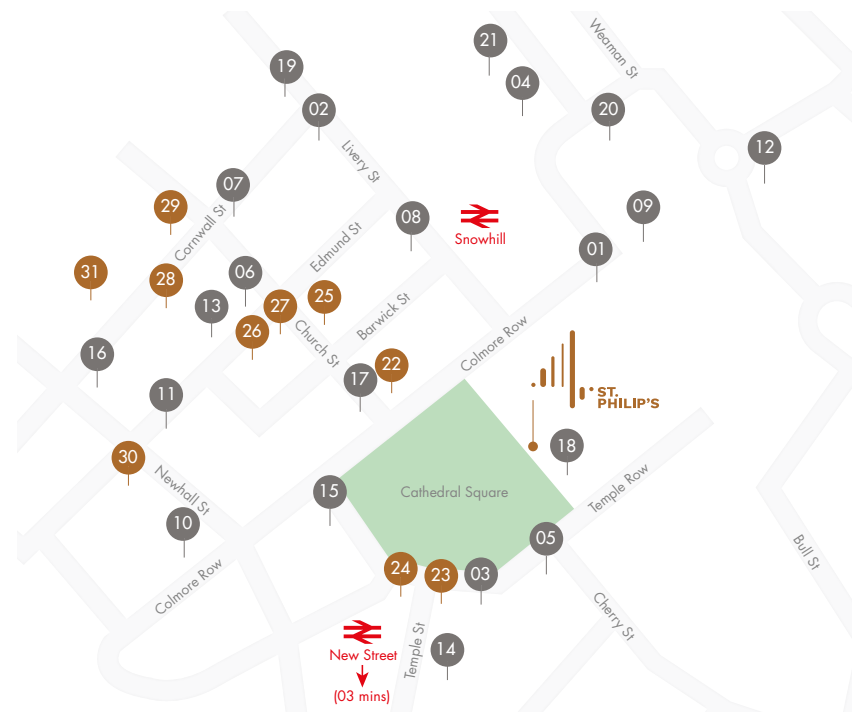

It is a bold building and address that is sure to leave a lasting impression.

OUTSIDE

Sat in a prime location in the heart of the central business district, 4 St Philip's overlooks St Philip's Cathedral and benefits from the very best of Birmingham's transformed amenity offer. There is a wealth of new and established restaurants, bars and coffee shops along with a diverse retail environment on the immediate doorstep.

Welcome to the home of the majority of high profile business occupiers in the city.

SUSTAINABILITY

Sustainability is in our DNA

4 St Philip's utilises the latest renewable energy saving and harvesting technologies to provide a class leading sustainable environment.

Energy Saving Technologies

- Currently one of the most energy efficient heating/cooling systems available, which incorporates heat recovery.
- Thermal modelling has been undertaken to target key areas to improve the building's insulation characteristics.
- LED lighting is incorporated throughout.

Energy Harvesting Technologies

- A 10kWp Photovoltaic solar panel system is installed on the roof which will generate electricity for the core areas of the building.

Financials

- A target zero energy cost to run the core areas of the building.
- The Government paid annual subsidy (Feed in Tariff) will be transferred to the service charge. This provides a long term financial cash benefit to reduce the running costs of the building.

By utilising these technologies it is anticipated that this will lead to savings of 94 tonnes of CO₂ per annum.

Energy Performance...

Estimated EPC B.
